

40kW & 65kW Electric Aircraft Charger

Mini Cube

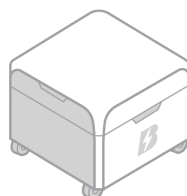

Mini Cube is designed as a self-contained, Level 3-DC Fast Charger for use with all CCS vehicles including aircraft, cars, buses, trucks, and vans, available in 40kw and 60kw ratings. Integrated caster wheels let you easily move Mini Cube to where it is needed to charge a vehicle and conveniently store it out of the way when not in use. Mini Cube's unique design provides storage for the AC power cable and the DC charging plug, keeping your hangar clean and presentable while minimizing trip hazards.

Mini Cube Specifications

	Mini Cube	Mini Cube+		Mini Cube	Mini Cube+
Protocol	CCS1	CCS1	Weight	245 lbs	290lbs
Continuous Output Current	60A DC	100A DC	Dimensions	28.25 in x 28.75 in x 24.25 in	
Maximum Output Voltage	1,000V DC	1,000V DC	Communication	OCPP 1.6	
Total Cable Length	30 ft + 15 ft	30 ft + 15 ft	User Interface & Payment	iOS and Android App	

Mini Cube AC Input Specifications

Mini Cube

Frequency	50 Hz	60 Hz
Input Voltage	400V AC	480V AC
Input Amperage	63A AC	60A AC
Phase	3Ø + PE	

Mini Cube+

Frequency	50 Hz	60 Hz
Input Voltage	400V AC	480V AC
Input Amperage	125A AC	100A AC
Phase	3Ø + PE	

Connectivity

Mini Cube's integrated WiFi connectivity automatically connects your charger to BETA's Mobile App and remote monitoring system. Through the BETA App you can check the availability of the charger, start and stop charging sessions, and optionally collect payment for charging. Connection to BETA's Remote Monitoring System enables remote technical support from BETA engineers if any issues arise.
